REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Note that the Applicants amendment and arguments are sufficient to overcome the art rejections in the Office Action mailed on 11/20/2003 and sufficient to place the instant claims in condition for allowance. It is noted that the combination of Day (US 5,834,082), Mead (US 4,380,253) and Boyce et al (US 5,741,574) teaches a reconstruction of the panel in Day to arrive at Applicants' core panel comprising rovings extending completely through the thickness of the core panel between the strips to tie the skins together. However, the amendment to claim 85 "the rovings extending continuously over the opposite core surfaces to substantially increase the area of resin bond between the rovings and the skins" distinguishes the fiber reinforced core panel of the claimed invention from the prior art. There is no suggestion or teaching in the Day reference to employ the rovings extending continuously over the opposite core surfaces to substantially increase the area of resin bond between the rovings and the skins because Day teaches the foam strips molded with the recesses. Thus when the adhesive is applied, the adhesive fills the recesses and forms the fillets and provide a stronger bond between the edge portion of each roving and the adjacent skin for increasing the strength and stability of the foam core sandwich panel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
